Dear Mr. Umer Memon,

I hope you are doing well.

Thank you for sharing your business requirements. Based on our discussion, I am proposing a fully customized Sales, Inventory, and Accounts Management System designed specifically for your company VIZO.

This will be a **dedicated customized system** built according to your workflow, covering your multi-city operations, warehouses, and internal departments.

SYSTEM OVERVIEW

The system will be fully automated and tailored to your business processes, reducing manual work and improving accuracy across all departments.

It will include both a Web Application for management and a Mobile Application for field operations and sales.

CORE FEATURES

- **User Roles and Permissions**

The system will support multiple user roles including Super Admin, Accountant, Order Department, and Sales team.

Admin will have full control to assign and modify permissions such as view, create, edit, and delete access for each module.

- **Product and Inventory Management**

Complete product management with warehouse-wise stock tracking.

Multiple warehouses will be supported with real-time inventory updates.

Stock visibility control (including hidden quantity option) will also be included.

- **Stock Transfer System**

Transfer of stock between warehouses and cities (for example Karachi to Lahore) will be supported.

Each transfer will be properly tracked with records and status.

- **Order Management**

Sales team will be able to create orders from web and mobile.

Order department will process and manage orders with proper flow and tracking.

- **Accounts and Financial System**
A complete accounting module will be included with ledger system, debit and credit entries, sales and returns handling, expenses, and payment adjustments.
Account-to-account transfers will also be supported.
- **General Voucher System**
The system will support general vouchers (journal entries) for non-cash transactions such as adjustments and internal accounting entries without affecting cash directly.
- **Reporting System**
Detailed reports will be available for sales, inventory, accounts, and customer activity with filters and summaries.
- **Mobile Application**
A dedicated mobile app will be included for sales operations.
It will allow order creation, product selection, and barcode scanning for fast processing.
- **Barcode Integration**
Products can be scanned using barcode through mobile for quick billing and inventory handling.
- **Artificial Intelligence Integration**
The system will include smart insights such as sales trends, low stock alerts, and performance summaries to assist in better decision making.

PROJECT COST & BREAKDOWN

Total Project Cost: PKR 300,000

Cost Breakdown:

- Web Application Development: PKR 200,000
- Mobile Application Development: PKR 100,000

Payment Plan:

- PKR 50,000 advance (project kickoff)
- Remaining PKR 250,000 will be paid in mutually agreed installments during the development phase

MAINTENANCE & SUPPORT (IF REQUIRED)

Monthly Maintenance & Support: PKR 5,000

This includes:

- Basic technical support within 24 hours (via WhatsApp and Email)

Note:

Any entirely new feature or functionality outside the defined scope will be charged separately.

Minor updates and bug fixes will be handle in monthly maintenance.

PROJECT TIMELINE

Estimated Development Time: 2 to 2.5 Months

The timeline is based on the currently defined scope. If additional requirements are introduced during the development phase, the timeline may be extended accordingly.

SYSTEM WORKFLOW CLARITY

The system is designed to fully automate your business operations from order creation to delivery, accounting, and reporting.

Each department (Sales, Order Management, Accounts) will be connected through a centralized system, ensuring real-time data flow and eliminating manual errors.

All business processes including stock movement, financial entries, and reporting will be handled automatically by the system.

This ensures:

- Better control
- Faster operations
- Accurate financial tracking
- Reduced dependency on manual work

FINAL NOTE

This system will be a fully customized and scalable solution built specifically for your business. It will help streamline your operations, improve efficiency, and provide better control over your sales, inventory, and accounts.

I look forward to your feedback and will be happy to discuss the next steps.

Best regards,

Ammar Kamran
